About

Full Stack Engineer with 4+ years of experience based in Brooklyn, NY. 617-640-0652

Skills

CSS · Elixir · Figma · Git/GitHub · HTML · Javascript · Object-Oriented Programming · Python · React · React Native · Ruby on Rails · Sentry · Tailwind · Testing · TypeScript · Vue.js · Phoenix · REST & GraphQL APIs

Experience

Seascope

Mobile Developer (Solo Project)

Remote, NY

May 2025 - Present

- Solo Supabase, TypeScript and React Native Expo mobile app for journaling and meditation
- Architected a Supabase-backed data model (Postgres + Row Level Security) with edge functions, trigger, and cron jobs that unify journaling and meditation streaks, friendships, and game events
- Secured auth flows with deep links and added rate-limiting logic to curb email spam
- Owned everything from backend to frontend to UX to App Store submission
- Implemented offline game session syncing using AsyncStorage deltas and background workers, reconciling conflicts when connectivity resumes without data loss

Peek

Full Stack Engineer

Remote, NY

May 2024 - May 2025

- Startup offering B2B booking software and a B2C experiences marketplace (peek.com)
- Developed full-stack booking features, supporting thousands of operators and millions in annual bookings
- Delivered scalable UIs with A/B testing, improving booking flows and business visibility while increasing booking conversion by 12%
- Led end-to-end product design and frontend architecture for numerous features such as searching, filtering, and sorting activities

Peek

Frontend Engineer

Remote, NY

Dec 2022 - May 2024

- Built, tested, and maintained dynamic interfaces
- Migrated legacy code to use Phoenix LiveView

Prelude

iOS Developer (Solo Project)

Remote, NY

Nov 2023 - Present

- Solo SwiftUI project to track personal music listening using Spotify's Web API
- Built and designed a SwiftUI-based mobile app to visualize user listening data
