Charlotte Moche

Frontend-leaning full-stack engineer with 6 years of product experience. Fine arts background informs a genuine design sensibility and high bar for interaction quality. Experienced shipping zero-to-one features end-to-end, from component architecture to backend APIs, with a track record of owning product quality across the full stack.

Experience

Zenith Health - Senior Full Stack Engineer
Remote, NY • July 2025 - June 2026
VC-backed startup for women's maternal health

- Architected and shipped performant, accessible React Native components
- Leveraged agentic coding tools for system design, implementation planning, code generation, debugging, refactoring, testing, and technical documentation
- Designed and built an admin-panel component library (buttons, cards, and other core components) for other developers to use
- Owned end-to-end feature delivery across mobile, web, and backend API layers
- Designed and translated product requirements and concepts into polished interfaces, maintaining craft and quality
- Integrated mobile clients with backend services, owning the full vertical of a feature from database to rendered UI
- Built realtime streaming updates for an AI chat agent, handling incremental backend events (step/coordinator updates, batched partial responses) to render progressive, low-latency UI as answers streamed in

Peek - Full Stack Engineer
Remote, NY • Dec 2022 - May 2025
Startup offering B2B booking software and a B2C experiences marketplace (peek.com)

- Led frontend architecture and product design for core user-facing features including search, filter, and sort, shipping zero-to-one experiences with direct ownership over interaction design and technical decisions
- Drove a 12% uplift in booking conversion through A/B-tested UI improvements, validating product hypotheses with real users before over-investing in solutions
- Delivered scalable, full-stack booking features supporting thousands of operators and millions in annual bookings, demonstrating ability to balance craft with reliability at scale
- Built and maintained a comprehensive test suite that measurably reduced production bugs, treating reliability as a first-class concern
- Migrated legacy codebase to Phoenix LiveView, gaining deep familiarity with real-time UI update patterns directly relevant to live-editing and collaborative design surfaces

Changing Room - Front End Engineer
Remote, NY • July 2021 - Jan 2022
Early-stage startup focused on making sustainable fashion discovery more accessible and transparent

- Developed interactive frontend features
- Created a personality quiz and custom popups to increase user engagement
- Collaborated with backend and UX teams to build tools for environmental transparency

Wino(t) - Staff
Brooklyn, NY • July 2021 - November 2022
Boutique wine shop

- Recommended and sold wine to customers, tailoring picks to taste and budget
- Participated in restocking and organization of the shop floor
- Ran POS transactions and handled daily cash reconciliation
- Hosted in-store tastings and customer events
- Trained new staff on product knowledge and service standards

Raphael & Raphael LLP - Front Desk Staff
Boston, MA • Nov 2019 - Nov 2020

- Greeted clients and managed high volume communication during tax season
- Organized and processed client documents
- Maintained office supplies and coverage during peak season

La Morra - Assistant Manager
Boston, MA • Apr 2014 - Dec 2019
Fine-casual Italian restaurant

- Managed, compiled, and created content for Instagram account, including photographing produce and dishes and writing captions
- Designed event advertisements with photoshop to send out to guests via email list
- Cooperated with owners to ensure their needs were met and restaurant protocol was followed, such as steps and flow of service, helping organize private events, supervising treatment of patrons, and quality of food plating before leaving the kitchen - resulting in positive feedback from guests and staff alike
- Sourced and selected cheese plate from local businesses

Solo Projects

iOS Developer (Solo Project) · Prelude
Remote, NY • Nov 2023 - Present

- Designed and built a SwiftUI app from scratch to visualize personal Spotify listening data
- Conceived, designed, and shipped a polished native experience independently

---

Education

Massachusetts College of Art and Design
Bachelor of Fine Arts

Actualize Coding Bootcamp
Certificate in Full Stack Web Development
